

REMARKS

As permitted by 37 C.F.R. §1.63(d)(1)(i-iv) and MPEP §201.06(c) the Applicant has filed herewith a copy of the original Declaration and a clean copy of the specification in Appendix B. The specification does not contain any new matter over the earlier applications to which priority is claimed under 35 U.S.C. §120. The accompanying specification in Appendix B differs from the original specification for parent application serial No. 10/372,625 as shown in Appendix A.

Applicant's clean specification is provided to take advantage of the provisional rights potentially available to the Applicant under 35 U.S.C. §154(d). The Applicant asserts that no new matter has been added.

The Applicant respectfully requests entry of the amendment prior to examination of the above-referenced application.

Respectfully submitted,

Jasper W. Dockrey
